

**INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY, OCTOBER 25, 2003 – 0800 MDT
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was moderate in Southern California Area and Northern California Area, and light elsewhere. Nationally, 167 new fires were reported. One large fire was contained in the Rocky Mountain Area. Very high to extreme fire indices were reported in Arizona, California, Colorado, Georgia, Idaho, Indiana, Oregon, Montana, North Dakota and Utah.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

GRAND PRIX, San Bernardino Unit, California Department of Forestry & Fire Protection (CDF). A Type 2 Incident Management Team (Dietrich) is assigned. This fire is in heavy chaparral, two miles west of Mira Loma, CA. Torching and spotting occurred within the perimeter, and extreme fire behavior was observed at the fire front and on ridgetops.

ROBLAR 2, Camp Pendleton Marine Corps Base. A Unified Command between a Type 2 Incident Management Team (Domanski) and the California Department of Forestry & Fire Protection (Clayton) is in place. This fire is in chaparral, six miles west of Fallbrook, CA. Fire behavior was extreme in the interior and light along current containment lines. A voluntary evacuation notice has been issued for the community of De Luz.

PIRU, Los Padres National Forest. This fire is in grass and brush, 14 miles northwest of Santa Clara, CA. Active fire behavior with spotting on the north and west flanks was observed.

PARADISE 2, Sequoia & Kings Canyon National Park. This wildland fire, is in mixed conifer and chaparral, seven miles northeast of Three Rivers, CA. Fire activity continues in well developed thermal belts, and roll-out along ridge tops and in drainages has caused interior surface fire.

OUTLOOK:

RED FLAG WARNING: For much of northern California west of the Sierra/Cascade crest through Sunday morning for low humidity and moderate easterly winds.

RED FLAG WARNING: For strong downslope winds and low humidity over the southwest corner of Utah.

Weather Discussion: Santa Ana winds will continue over southern California as high pressure builds over the West. Strong north to east winds will extend from Oregon to southern California, with windy conditions continuing over portions of Utah and Colorado. Elsewhere, a cold front will extend from the Great Lakes southward into Texas.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
EASTERN GREAT BASIN AREA Idaho, Bridger-Teton: Mostly sunny and cool with light north winds. Utah, Arizona Strip: Mostly sunny, breezy to windy, and cooler.	Idaho, Bridger-Teton: 40 to 51 mountains, 51 to 62 valleys. Utah and Arizona Strip: 47 to 63 mountains, 63 to 79 valleys.	Idaho, Bridger-Teton: 10 to 24% valleys, 12 to 31% mountains. Utah, Arizona Strip: 4 to 15% valleys, 8 to 24% mountains.	Idaho, Bridger-Teton: North or upslope 5 to 15 mph. Utah, Arizona Strip: North 10 to 20 mph with local downslope winds 20 to 35 mph in southern Utah.
NORTHERN CALIFORNIA AREA Clear skies, with locally gusty easterly winds	Mostly 70s and 80s with some lower 90s in the warmest valleys and some mid and upper 60s in higher mountain areas.	8 to 18% inland and 24 to 40% near the coast.	Easterly 8 to 18 mph with areas of gusts 25 to 35 mph in the morning, moderating to mostly 5 to 15 mph with gusts to around 20 mph in the afternoon.
WESTERN GREAT BASIN AREA Mostly sunny.	60s to 70s north 70s to 80s south 50s Mountains	15 to 20% North 5 to 15% South 15 to 25% Mountains	Upslope/upvalley in the morning becoming east-northeast at 5 to 15 mph.

PROPER USE OF TRIGGER POINTS

Accurate situational awareness (SA) requires constant reassessment of conditions (existing or potential) that may impact the safety and effectiveness of firefighters. Keeping an eye out for the 18-Watchout Situations and establishing operational / environmental limits (“trigger points”) ahead of time can help to focus SA, prompt reassessment, and help you re-evaluate the risk of current actions. The following items are things to consider in your planning and discussion. Remember, trigger points are NOT decision makers, but serve as predetermined cues to prompt you to re-evaluate the situation and associated risks, and help you to determine and implement the proper course of action.

- Preplan! Don't wait until you're in the wrong place at the wrong time---with no time.

- Trigger points should be based on measurable factors such as:
 - RH
 - Winds
 - Fire Behavior
 - Topographical boundaries
 - Time constraints/Time of day
 - Time/distance to safety zones
 - Loss of support resources (airtankers, helicopters, etc.)
 - Other operational considerations (e.g., firefighter fatigue, loss of lookouts or communication, etc.)

- As you approach predetermined trigger points, go through the Risk Management Process to help you decide if a change in tactics is appropriate. (See the Incident Response Pocket Guide)
 - Gather information to assure good Situational Awareness
 - Assess hazards to anticipate serious risks
 - Establish hazard controls to mitigate serious risks
 - Make decisions based on your ability to mitigate those serious risks
 - Evaluate effectiveness of current actions

- Command/Leadership responsibilities when changing tactics
 - Communicate the changes to your subordinates, as well as to adjacent forces and up the chain of command
 - Account for all your people
 - Make sure everyone knows and follows the new plan
